PORTFOLIO OVERVIEW — MICHAEL GALLEGOS SUMMARY Multi-disciplinary engineer specializing in software development, embedded systems, robotics, AI integration, electrical engineering, and additive manufacturing. FEATURED PROJECTS Re-Hardwire AI Application • Full-stack AI mental health tool with ONNX-based TTS pipelines • Custom routing engine and modular architecture Custom Drone Builds • Fully engineered drones with custom firmware and sensor systems • Flight controller programming and tuning Embedded PCB Designs • KiCad boards for microcontroller and sensor integration • STM32 programming and serial debugging 3D Printer Firmware Mods • Custom firmware, calibration profiles, mechanical upgrades Rust Utilities • Beginner-level CLI tools and systems programming experiments TECHNICAL STACK Python, Rust, JavaScript, STM32, KiCad, Fusion 360, ONNX Runtime, Streamlit, Linux, WSL2 CONTACT Email: gallegosmike1997@gmail.com GitHub: github.com/gallegosmike1997 Portfolio: https://michael-gportfolio.vercel.app/
